

## Tips for Success

**Water:** Let your Air Plants soak in water for one hour every week. Allow them to fully dry on a towel before repositioning them in their location. If you notice your Air Plants are starting to brown or get curly, that means they need water.

**Perfect Temperatures:** These easy to care for plants will do well in any location that is between 55F and 85F. You can keep them indoors or outdoors in a well lit location with bright diffused light. Refrain from placing them in the direct sunlight.

**Designing With Air Plants:** The options are endless when it comes to having fun with Air Plants. Place them in a decorative container on your desk or coffee table, hang them in a wired frame, allow them to dangle from some twine, place them on the soil of your other houseplants, or do whatever your heart desires. Wherever you place them, just make sure that they are accessible and easy to get to so that you can soak them each week. If placing them in a terrarium, just beware that they like air flow. Invite your friends over and have an Air Plant party - inspire one another and get creative with these low maintenance, fun plants!

## Roberta's Gardens PLANTING AND GROWING GUIDE

**Air Plant Collection**  
*Tillandsia spp.*

We aren't happy if you aren't happy. If you have any questions regarding your order please call us at **1-800-428-9726** during the hours of 8:30 am and 4:30 pm EST.

You can email questions to us at: [plantquestions@robertasinc.com](mailto:plantquestions@robertasinc.com).

If your bulbs, cuttings, etc. do not sprout, or your plant dies within 90 days from the date of shipment, we will send you a replacement free of charge. We cannot accept responsibility for losses due to extreme weather or neglect. Simply call us at the above toll tree number or fill out the plant replacement form on our website at [RobertasUniqueGardens.com](http://RobertasUniqueGardens.com).

Roberta's will replace it with a similar or comparable plant at no charge. If your replacement is not available or it is too late in the season to ship, it will ship the following year.

Neither the retailer nor any other company involved in the sale or promotion of this product is a co-warrantor of this plant warranty.

## Plant Caretaking

**Upon Arrival:** Please take plants out of the box immediately and remove any shipping materials from around the plants. Soak them in water for 1 hour and allow to dry completely before positioning in the desired location.

**Planting Depth & Spacing:** These plants do not need to be planted in soil to grow. They absorb water and nutrients through the scales on their leaves.

**Potted Plants:** You may place them in decorative containers, but do not plant them in soil.

**Water:** Soak air plants in a large bowl of water for 1 hour, once a week. Tip: pick a day of the week to do this so that you can remember to soak them every week.

**Drying:** Allow air plants to dry out on a towel for a few hours after soaking.

**Fertilizer:** Once a month add a little bit of Roberta's Bounty to the bowl of water that you are soaking your Air Plants in. This will give them extra vigor.

**Pet Considerations:** Ensure your pets do not consume plants.

## Planting Steps

**Step 1** Remove plants from their box and take off other packing materials.

**Step 2** Give Air Plants a nice soak in water for about 1 hour and allow to dry before placing in desired location.

**Step 3** These plants do not need to be planted in soil to grow.

**Step 4** Place Air Plants in a bright room that is well lit with plenty of windows. Get as creative as you desire when choosing where to place them in your home. They also do great outdoors as long as temperatures are above 55F.
